EXPERIENCE

Technology Analyst

December 2021 - Present

Infosys

Working with an insurance company.

My work role include working with both frontend and backend technologies such as React js, Javascript,Node js, Express along with Redux for state management and material UI to develop the modules for the ongoing product and the new product.

Improved the code quality and better edge case handling.

Worked on Node Js and Typescript to create several API's and unit Testing with Jest.

Languages Known
1 Hind
2 English

System Engineer

Tata Consultancy Services
Worked on web development projects to create custom website using React JS, JavaScript, Bootstrap, HTML and CSS. I have worked as a front End developer to design the view part of E Commerce website.

Project - worked on E-commerce website as a front end developer. My responsibilities were to render the data from API to screen and manage the Login and Sign up form.
